Washington State Patrol  
Breath Test Section  
811 E. Roanoke  
Seattle WA 98102

Re: Software approval

Dear Sgt. Gullberg:

Thank you for your letter of 12/15/97 requesting approval of revised software. After review of the testing performed by my staff earlier this month, and of the changes detailed in your letter, I grant approval of this version of software.

Please notify the technicians that, effective from today's date, the following versions of software are the only ones approved for use in the DataMaster for evidential purposes, until further notice.

**Version A:**

For the older instruments requiring four EPROM's and a cover without a built in keyboard:

U16 - U16 vers.003, U23 - U23 vers.005,  
U25 - U25 vers.006, U26 - U26 vers.006

For instruments requiring a single EPROM:

**Version B:**  
110895.BIN

**Version C:**  
102497.BIN

Use of versions B or C will be indicated by 76016-002 (11/08/95) or 76016-003 (10/24/97) respectively, printed at the top of the breath test document.

Sincerely,

Barry K. Logan Ph.D.  
Washington State Toxicologist
